

Meeting Notes March 4 2020

Missing Members:

-

Previous Weeks Tasks:

- Data entry page
 - Done as it works correctly visually
 - The form doesn't submit correctly
- Connecting the data entry page with the database through perl
- How to do a login system (Michael) security wise
 - Ryan will still talk with their team about further details, but his email about general login practiced has been forwarded

Meeting Discussion Notes:

- Team survey
- Sponsor Meeting Tomorrow
 - Data entry page, show the visual of it
- The training materials sent to us
 - Images look good

To Work:

- Training Page
- Login System
 - Check confirmation that we won't be tying into their login system
 - Otherwise begin the process of finding an algorithm and hashing passwords to send to the database
- What is Ryan working on in the docker? We have a database working at the moment.
 - How to print something from the database, asking Ryan
- Tanner to do garden database
 - Latitude and Longitude as well as ID so that we can place them onto the map as well as pull information to display when a location is interacted with
