Tanner - backend guy
Michael - Can help with frontend
Tanya - Can do front end, likes backend, python
Kara - Front end
Percy - Like NCAR (: Little front, little back,
Abbi - Like backend, can do frontend
Hunter - medium experience in both front and back

Team lead - Kara: documentation, manage github, group assignment submissions
Tech lead - Michael

Weekly stand-ups: what you worked on, what you plan on working on, blockers

Goals - Mobile friendly website to replace paper worksheet, go to digital database
1. Info about project
2. Training on how to detect
3. Collect data on plants in these garden
4. Visualization of data

For sponsor meeting:
1. Current tech stack
2. What info they want for dynamic graph
3. What they have for prototype already, database?
4. How many meetings a month
5. Do we build on what they have or start over?
    a. If start over, what do they want us to bring over
6. How to access their code / how they access ours
7. If they are using something outdated, move to industry standards
8. How would they like people to be trained
9. User based login
10. What kind of questions they ask
11. Who are the target users?
